

# WHAT IS A PHASE 1 CLINICAL TRIAL?

Clinical trials play a pivotal role in advancing medical research. These trials depend on dedicated volunteers who contribute their time and effort to science. Without patients / participants, like you, clinical trials across all phases would be impossible. Here's what you need to know about trials:

## 3 KEY PHASES OF CLINICAL TRIALS:

**Phase 1:** Earliest phase to assess **safety** and **side effects**.

“Life's most persistent and urgent question is: What are you doing for others?”  
~ Martin Luther King, Jr.

**Phase 2 & 3:** Determine **safety, efficacy,** and optimal **dosing** in patients with specific conditions.

## PHASE 1: THE BASICS

**Main Focus:** Assessing if new medications and vaccines are safer for certain patients and identifying potential side effects.

**Special Consideration:** Some Phase 1 trials specifically enroll patients with liver or kidney disease. Their unique response helps researchers tailor drug dosages for unhealthy populations.

**Duration:** Phase 1 trials might last several days to weeks.

**Stay at the Clinic:** To ensure your safety and gather necessary data, you might need to stay at the clinic during the trial. All of your patient information is confidential. Worry not, we ensure your comfort with meals, a cozy room, recreational items, and Wi-Fi.

## BEFORE YOU PARTICIPATE

**Informed Consent:** This is a comprehensive document detailing the study, including the medicines, procedures, possible risks, schedule, and length of the study. Your rights as a participant are also outlined.

**Thorough Understanding:** Our team will go over every detail with you. Once you're comfortable and understand the study obligations and potential risks, you will be asked to sign the consent form.

## REMEMBER

**Voluntary Participation:** You have the right to stop taking part of the study at any time, for any reason. You'll be compensated for the portion of the study you complete.

**Compensation & Reimbursement:** Participants may be compensated throughout their treatment. The payment amount and frequency will vary with every unique trial. Travel costs may be included in your overall study compensation.

## BENEFITS OF PARTICIPATING

### Experienced Care:

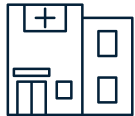

Our skilled staff ensures you are safe and you are monitored closely throughout the trial.

**Transportation:** We may offer services to and from your appointments.

### Top-Notch Facilities:

Clean, comfortable environments.

**Stay Updated:** Be in the loop about new study opportunities.

### Make a Difference:

You're a key part of advancing healthcare and bringing new treatments to patients globally.

We thank you for considering being a part of this journey. Your dedication can pave the way for safer medicines and treatments. Together, we can make a difference.
